

Caretips for textiles

(Valid in Europe and some other countries, not Canada, USA, Australia and Japan)

-  The numbers in the Symbol tub calls the maximal washing temperature for normal washing in the maschine. The bar at the bottom of the symbole means "Softwashing".
-  Double bar: Gentlewash, soft or wool wash.
-  Wash by hand
-  Not washable article
-  Iron: The points into the iron shows what temperature is the best for the textile
-  One point: lowest level (polyacrylic, polyamide, acetate). Sensitive textiles turn into left or use a damp cloth.
-  Two points: middle level, moderate heat (wool, silk, polyester, viscose). Steam ironing allowed.
-  Three points: highest level (canvas, cotton). The clothes should be dampish. Pressure-sensitive clothes (example: dark canvas) ironing with a damp cloth. Steam ironing allowed.
-  Do not ironing!
-  Bleaching allowed!
-  Bleaching only with oxygen!
-  Do not bleaching! This clothes tolerate no chlorine bleach.
-  This clothes may laundering in the drier. If there were sensitive textiles please check the temperature is not to high, because of wrinkling.
-  Dryable by lowest treatment of temperature
-  dryable by normal treatment of temperature
-  Do not dry in drier! Some textiles as example cotton, visocose, silk don't tolerates the drier.
-  Chemical cleaning
-  The different Characters (A, F, P) are determined for chemical cleaning. They give notice to the solvent coming into question.
-  with P: perchlorethylen
-  with F: KWL
-  with W: Wet cleaning (water)
-  Softwashing with the given character
-  Absolut softwashing with the given character
-  No chemical cleaning possible!
If the sphere is black: no wet cleaning
